

The sinking boat!

You are on a boat with these ten people. The boat is sinking. Your only hope of survival is to use the one available lifeboat. However, the maximum capacity of the lifeboat is only five people (including you!). You must choose four passengers to accompany you in the lifeboat.

1. A five year old boy from Peru.
2. The boy's 78 year old grandfather.
3. An English doctor aged 35.
4. A Spanish nun who has taken a vow of silence.
5. An escaped prisoner from India.
6. A writer, aged 45, who speaks seven different languages.
7. A beautiful 18 year old waitress from Las Vegas.
8. A Russian athlete aged 25 who is tall and very strong.
9. An Italian Chef, father of four young children.
10. A gay American Chemistry professor, aged 53.

Now you must reach a decision. Defend the choices you have made. Give convincing reasons.
